1) Accessibility matters
2) Growth and decrease coexist
3) The Alps are ageing

Data from Austria, Germany, Italy, Liechtenstein, Switzerland and Slovenia refer to 1.1. 2013. Data from France refer to 2010 Census data. For information on the indicator and on the data elaboration refer to appendix 1. Sources: Statistical Data: National Statistical Offices; Terrain: USGS (2014); Administrative boundaries: Towns, Water:©EuroGeographics, 2009; National border: ESR; Perimeter Alpine Convention: Ruffini et al., 2008.

4) Employment: intra-alpine specificities
5) Secondary education: higher in the Alps, gender specificities

Data source: RSA 5, Permanent Secretariat of the Alpine Convention, 2015
Own elaboration
6) Tertiary education: country and gender specificities

Data source: RSA 5, Permanent Secretariat of the Alpine Convention, 2015
Own elaboration
Demographic change is shaping the Alpine population of the future, both on a quantitative and qualitative level. An effective planning (policies, services, infrastructures) has to take in consideration its impacts accordingly.
Thank you!
