Young & Old

Spatial planning
= taking care of our
environment just as
we make ourselves
beautiful

Katharina

Active Youth

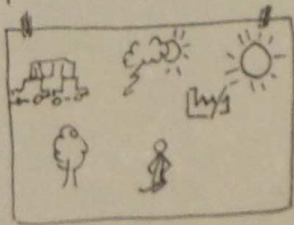

TOPICS

NOT CIPRAS

AlpMonitor

- Common projects
- Strong cooperation young and old

AGENDA

- Check-in
- current situation
- ☹️
- Group work
- 📷 Photo shooting
- ☺️ Lunch
- Planning
- ☹️
- National waste groups
- Check out
- the END

0. Introduction

5.2.2016 Claire

Never seen such a large Slovene delegation!

1. Warming up

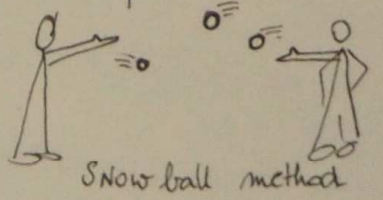

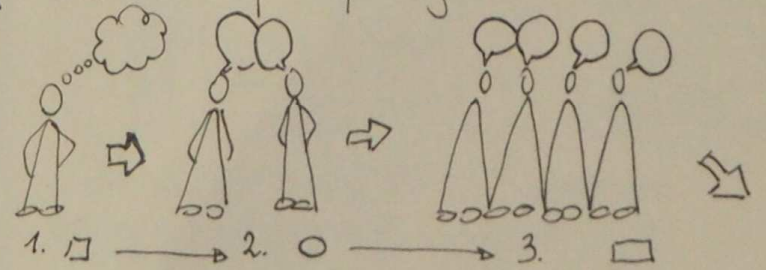

I know zero but I like nature & want to learn more

I'm studying I know a few case studies

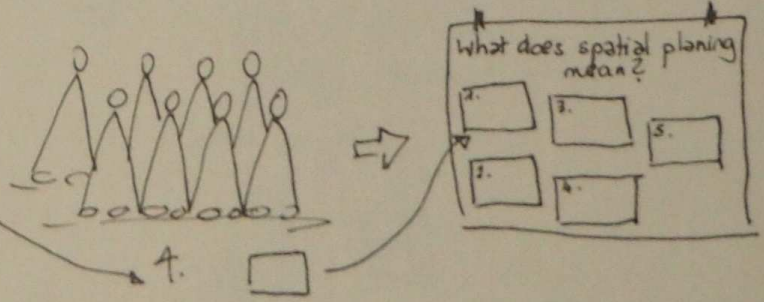

? What do you know about spatial planning!

? What does spatial planning mean to ME?

- | | | | |
|-----------|-------------|-----------|------------|
| Strategy | tools | territory | economy |
| Synergies | instruments | nature | ressources |
| | | culture | land use |
| | | territory | |

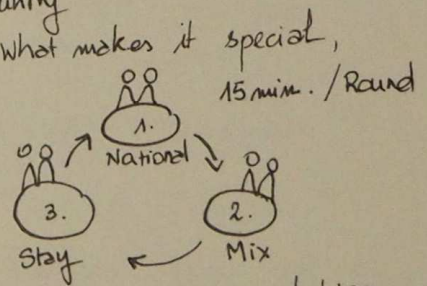

Christian: Do we have same understanding of Quality of life? Same exercise

Michaela: Not scheduled. Good tip. We hope we all experience quality of life together

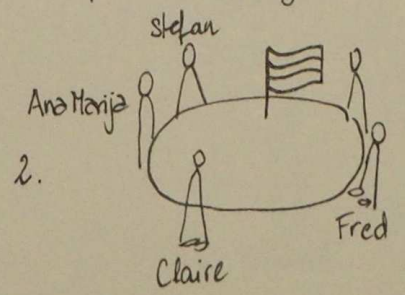

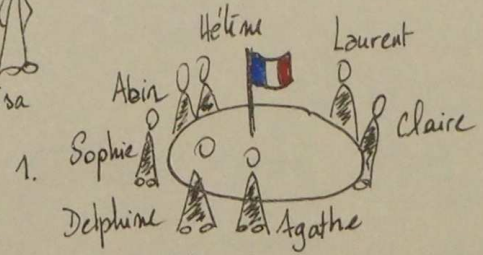

2. Current situation & trends in countries

Wolfgang

- Liechtenstein & Austria put together as a group
- Different levels & regulations in your country
- Good practice examples
- World Café • 2 hosts / table • 3 rounds

Lisa

- Good planning needed also where ^{depopulation} pressure is high
- Land development Program 1980s "STILLE ERHÖHUNG"
- ✓ □ Alpenplan → 3 Zones A, B, C → No building no roads... only forp
- 1974 UNIQUE in ALPS Urban ↓ Restrictions
- CH → Alpenbrache ↓ Riedberger Horn
- Alpenplan for eastern Alps (transboundary) = vision needs good political connexion

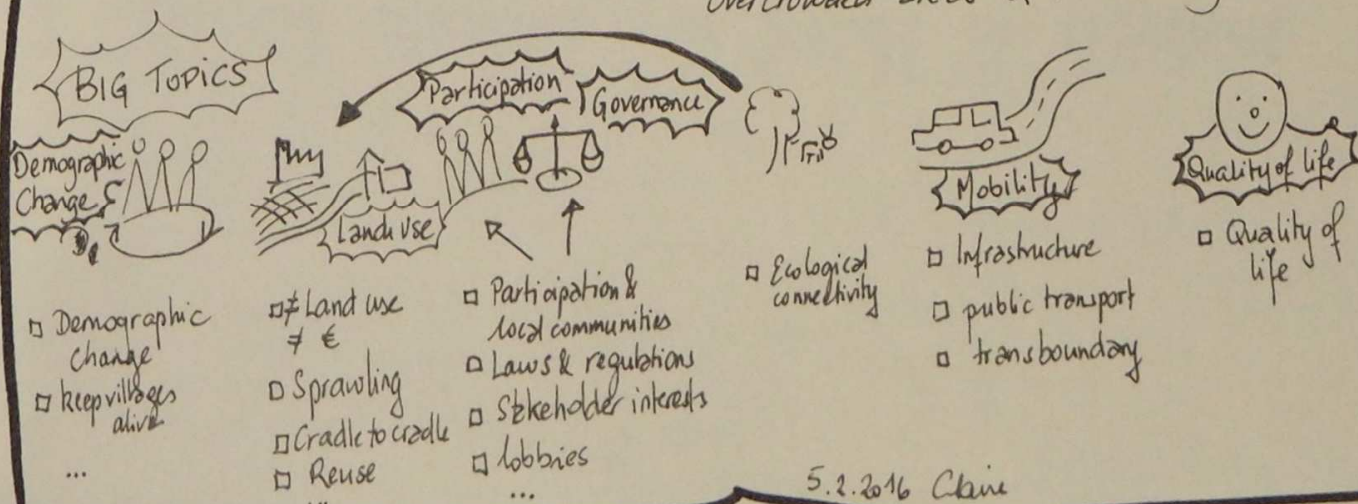

- (CH) Rotenturm Initiative
Spatial planning law → good base
→ very difficult implementation
- (FR) Loi SRU → good law with densification as aim
→ very difficult local implementation
- (SL) Regional planning level is missing

↪ Most relevant topics ⇨ Good national laws but local implementation is a problem

⇨ Alpenplan = good practice from DE. to be spread

⇨ Regional planning is often a problem
SL: inexistent
DE: wishes to make it "softer"
CH: individual interests dominate

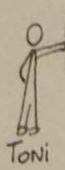

⇨ Challenge: finding a good balance between overcrowded areas & decreasing ones

3. TOPIC GROUPS

Each group looks for questions. What are the most important questions with regard to spatial planning & quality of life?

& the Alps!

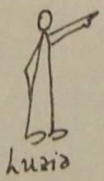

Participation

- How to start it?
- How to motivate people?
- How to modify political system to allow participation?

Demographic change

- How to cope with changes of people in Alps?
- What can the Alps offer?
- How to ensure good quality of life?
 } standard

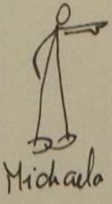

Land use

- long term priorities of land use?
- how to ↓ land use? "sufficiency"
- what is value of land? How can it change?

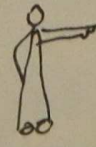

Governance

- How to recognize mountain systems as institutional form?
- How to create equilibrium between power, instruments, needs... to different scales of government?
- How to create strategic approach for mountain systems? (instruments, form)

Global dimension

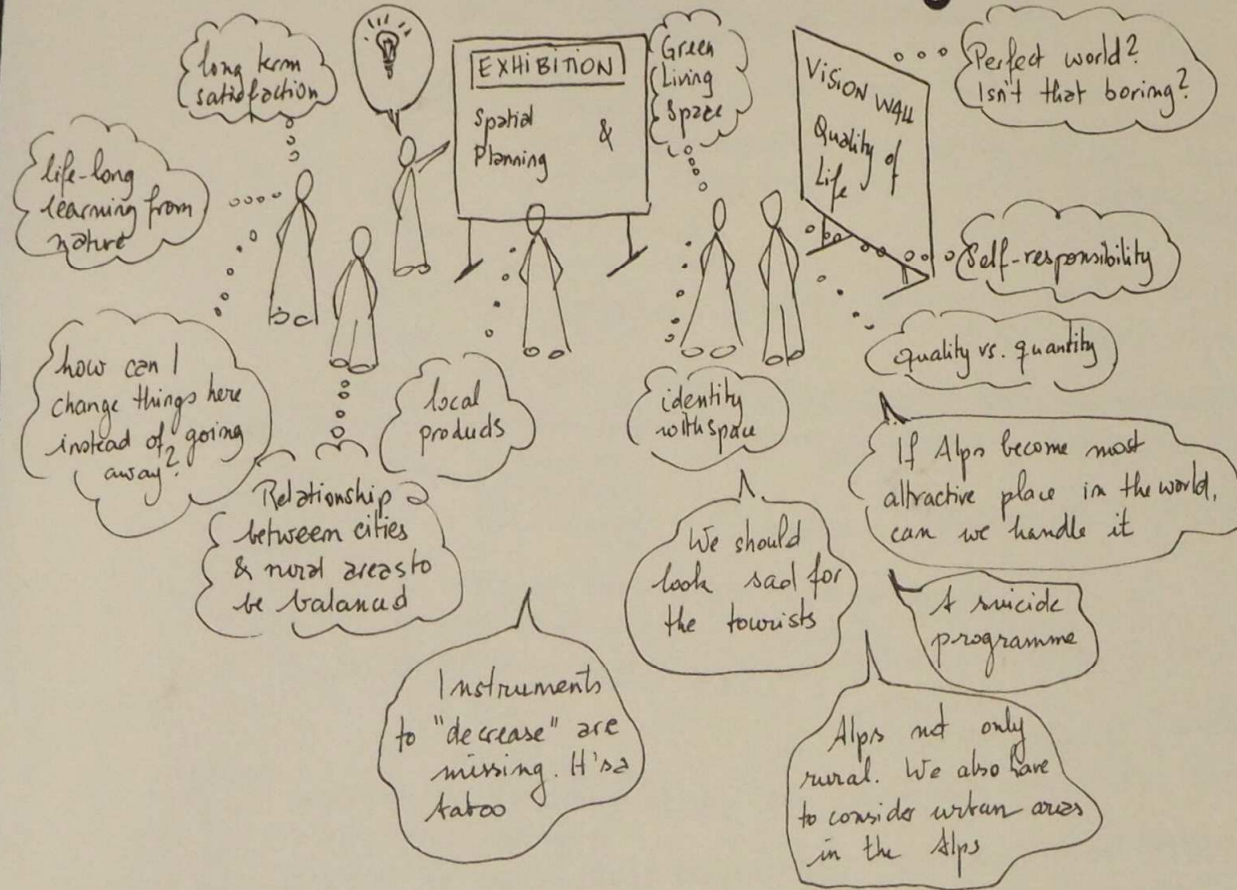

- How can quality of life become core topic of sp. planning?
- How can sharing / common good foster a new spatial planning?
- ^{how can sp. planning} Enable good relations between people + vs.

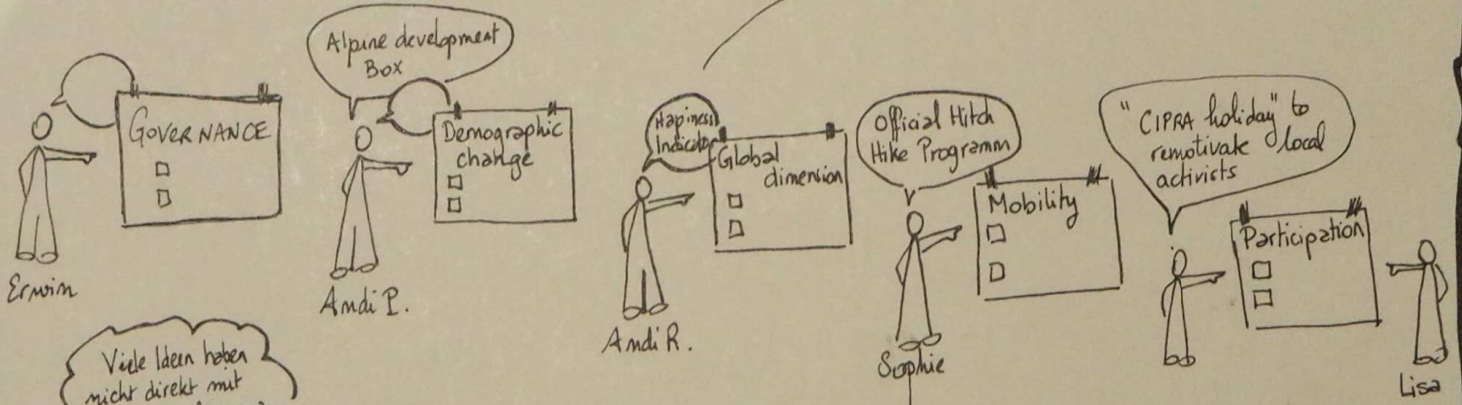

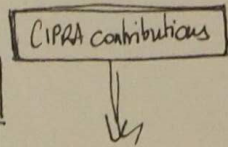

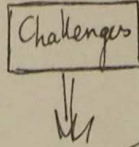

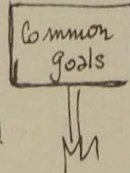

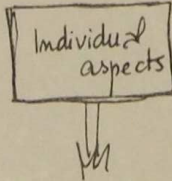

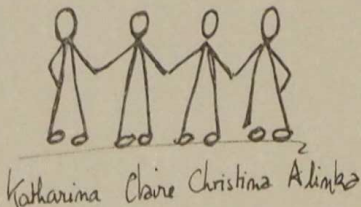

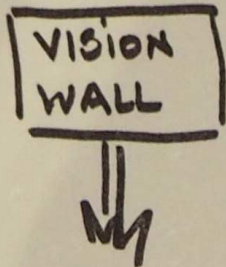

Mobility

- improving connexion between villages + towns (alternatives)?
- periodic tourism transport?
- who should be more flexible? or

4. Person who has visions should go for a walk ...

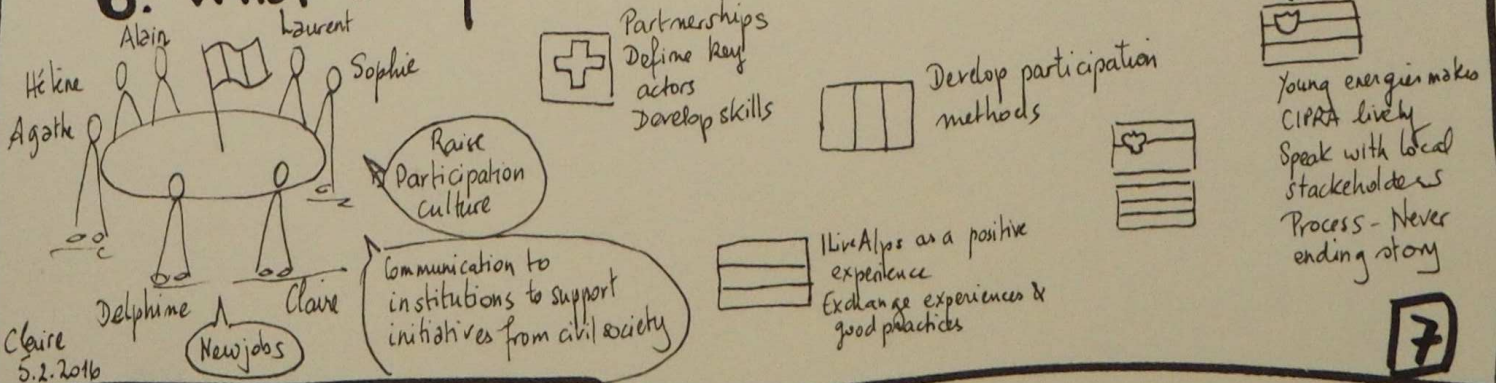

5. Big Answers to Big Questions

Viele Ideen haben nicht direkt mit Raumplanung zu tun. Es braucht noch Überzeugung

6. What do you take back to your country?

Claire 5.2.2016
